POLIISO AIR OUTDOOR ANTICORROSIVE

Codice: PAIR20GG080

Panel coated on both sides with an 80-µm embossed aluminum foil to which a special lacquer coating is applied, giving the product exceptional resistance to highly corrosive substances such as chlorine and salt. This feature makes the product versatile to installation in particularly aggressive environments such as swimming pools, spas, maritime premises and other saline environments.

The panels have standard dimensions of 1200 x 4000 mm and are available in 20.5 mmm thickness.

APPLICAZIONI CON POLIISO AIR OUTDOOR ANTICORROSIVE : AGGRESSIVE ENVIRONMENTS
